

# AFINA SEATING

## Specifications **AFINA SEATING**

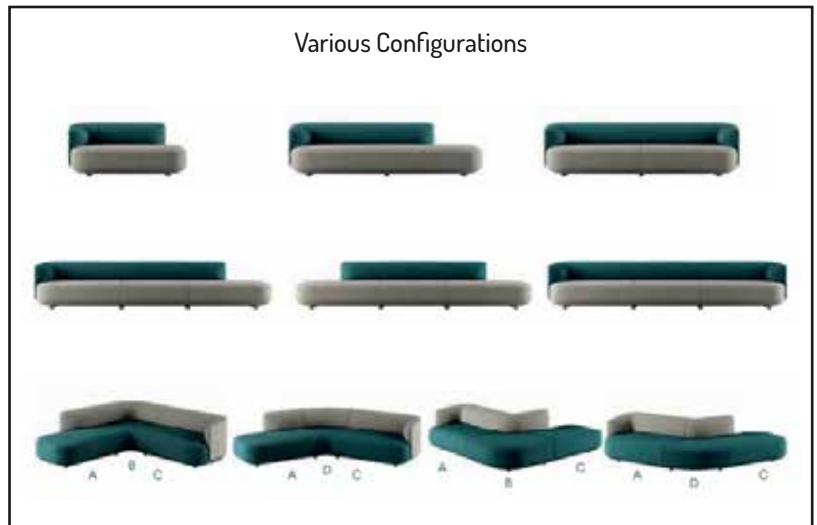

Afina is a modular system of sofas and ottomans designed for an eclectic use, ranging from lounges to waiting areas. It is a single armchair, a two- or three-seater sofa or a modular system with 60° and 90° corner compositions, featuring continuous or half backrests. Suitable for any area where people interact and socialize. Plywood frame; seat, backrest and armrests are padded with non-deformable flexible polyurethane foam. Crossed elastic straps inside the seat cushion enhance the comfortable feeling of the seat. Fabric upholstery. The cushions have a deep and generous width. Made of non-deformable multi-density rubber. The backrest has a curved shape, with a depth of 26 cm for perfect adherence to the lumbar region. The modular sofa can be set up with a long or half backrest. Cylindrical feet made of bronzed aluminum.

The attractive and contemporary design of Afina fits naturally into the most different architectural contexts. The solid and geometric lines of the seat act as a natural counterpoint to an enveloping wide backrest with soft molded lines. The never ending connection between these two elements is also emphasized by open-end modules, which stimulate conviviality and connection with the surrounding environment, suggesting a relaxed, domestic atmosphere.

In addition to the more traditional straight segments, with or without backrests, the Afina system combines 60° and 90° corner modules, concave and convex with or without backrests, allowing great freedom of composition and space occupation. The cushions are deep and generous in width for each user. Elastic straps are inserted into the structure of the sofa. The product of these formal interactions is a pleasant sensation of comfort.
