

Multiple Configurations Available

The Pouf collection is divided into six modules, different in shape and size, like so many segments and figures that can be freely distributed and reconfigured according to requirements. They are developed in linear poufs seating 1, 2, 3 people, while the particular geometries of the L-shaped, triangular or square poufs designed to seat 2 to 4 people form conversation islands that can gather or separate a group of people.

The internal structure is made of polyurethane foam while the base is made of MDF covered in black leatherette, and equipped with non-slip felt pads.

All poufs can be ordered with an optional 5V A+A USB socket integrated into the structure (not available for the 1-seater).
